

Get It Together for Infection Prevention

Why Dispose of Waste Properly?

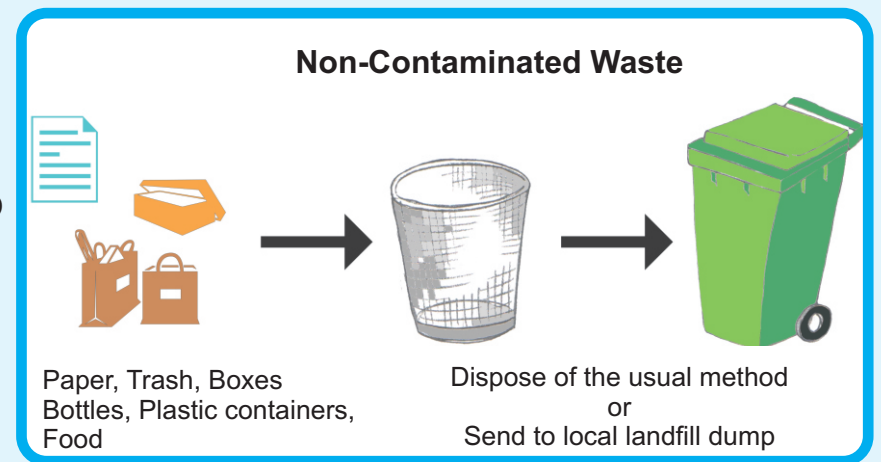

- To protect ourselves and our clients from infections
- To protect clinic staff and clients from injury
- To provide a clean environment
- To avoid foul odors
- To avoid attracting insects and flies

How to Dispose off Waste

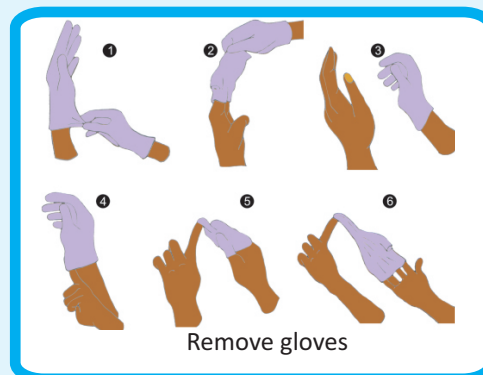

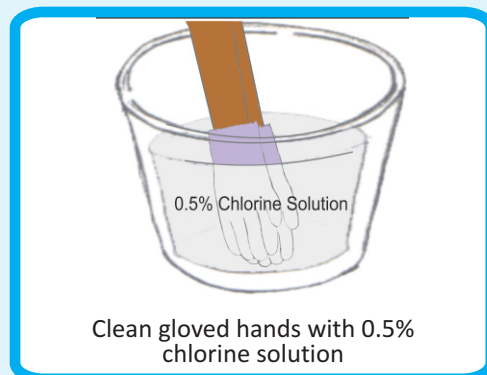

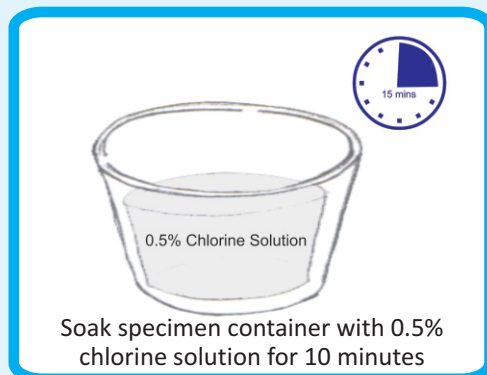

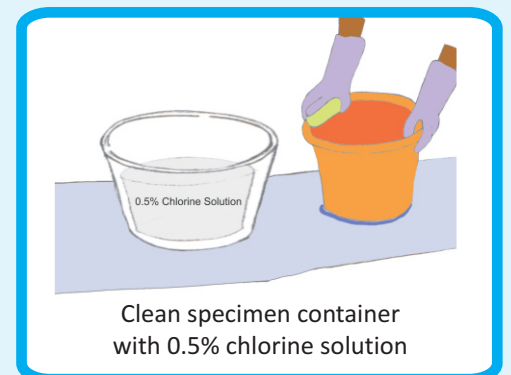

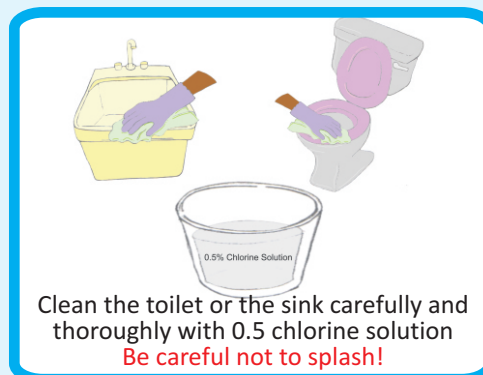

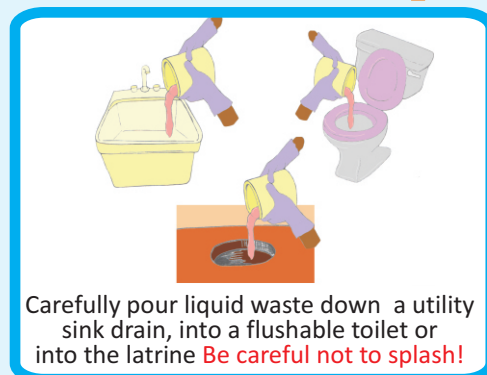

Non-contaminated Waste

Paper, trash, boxes, bottles, plastic containers, food

- Dispose off by the usual methods or send to local landfill or dump
- If containers or bottles were used for storing chemicals or pharmaceuticals, follow solid waste disposal steps

Liquid Waste

Solid Waste

Cotton, wrapping, used dressing, gauze, used needles, used syringes
