Nigeria Health Watch is a platform managed by the Health Watch Foundation- a non-profit organisation that uses informed advocacy and communication to seek better access to healthcare in Nigeria. We have dual strengths in health and communication and we have a strong social ethos that underscores all our activities. We seek to amplify some of the great work being done in the Nigerian health sector, challenge the bad and create a space for positive ideas and action. Through our various platforms, Nigeria Health Watch provides informed commentary and in-depth analysis of health issues in Nigeria, always in good conscience. We are not afraid to take on the difficult topics that many commentators choose to ignore. Our reach is wider than ever and our “voice” is recognised across the sector as a strong advocate for the improvement of the health sector in Nigeria.
